FINALLY, we go outside and it really feels like spring has arrived.

The change of seasons still holds the same fascination it did in childhood. We know summer is coming! If you are like us you want to spend as much time outside as you can. Dust off the deck, break out the chairs and you are ready to go.

In this climate area deck living has become as important as our kitchens and family rooms. A good many of our homes are on steep sites surrounded by the forest and sometimes even having the 'Long View'.

What you do with the deck is as important a decision as your kitchen, family room or any of your indoor spaces. Some folks even make their deck an 'Indoor' like space. Now the deck can be used in the rain, hot sun, when the bugs are out and even in the winter months

Just before you dust off the furniture and fire up the grill give us a call and we can talk about the wonderful possibilities your deck has to offer.

REMEMBER YOUR DREAM HOME IS RIGHT UNDER YOUR FEET.
All you have to do is hit reply or give us a call
for your no obligation in house design consultation.

HAVE A GREAT WEEK
and enjoy spring while it lasts!
